Role Played	Test Engineer	
Responsibilities / Contribution	<ol style="list-style-type: none"> 7) Worked as a test engineer in Team UX (Team User Experience). 8) Understood the product completely during knowledge transfer itself by exploring, reproducing customer/development problems and going through user documents. 9) Has reported some regression issues during KT period itself. 10) Worked on QF Test ,Selenium Web driver for automation and Mobile automation. 	
Team Size	8	

Project/Product 3	Microsoft System Center Data Protection Manager	Jun 14 – Nov 14
Customer Name	Microsoft Corporation	
Description	<p>SystemCenter Data Protection Manager (DPM) is a software product from Microsoft that provides near-continuous data protection and data recovery in a Microsoft Windows environment. It is part of the Microsoft System Center family of products and is Microsoft's first entry into the near-continuous backup and data recovery. It uses Shadow Copy technology for continuous backups. Microsoft System Center Data Protection Manager 2012 SP1 (SCDPM) is a complete enterprise backup system. Like all data protection systems, it copies data from its original home to a backup location. Whenever the original data suffers an issue, the backed up data can be restored to the original location from its secondary home. DPM offers the ability to create full backups, incremental backups, differential backups, and even bare-metal backups which can completely restore a system without having to first install an operating system or backup software.</p>	
Tools & Technologies	C#.NET, Visual Studio 2013, WTT (maintaining test cases, setting up machines etc.) Code Flow, Remote Desktop Connection Manager	
Operating System	Windows 8, Windows 2k8 R2, Windows 2K12 R2	
Role Played		

SDET (Working at client location)

Responsibilities / Contribution

- 1) Understood the product by doing a good bit of exploratory testing on the product.
- 2) Analyzed test case failures (Debugging) of the schedules done on WTT using the job logs.
- 3) Has been a part of the automation team in the project wherein I have developed methods using VSTS 2013 for automating certain features of the application.
- 4) Has logged some issues noticed during exploratory testing of the product.
- 5) Completed all the assigned manual/automated tasks before deadlines.
